

ROMAN
ELECTRICAL LTD

About Us

We specialise in delivering high-quality electrical installations for commercial fit-out projects across office, retail, hospitality, and mixed-use environments. With extensive experience in fast-paced refurbishment and CAT A/CAT B fit-outs, we provide complete electrical solutions from initial design coordination through to installation, testing, commissioning, and final handover. Our team is committed to delivering projects safely, efficiently, and to the highest standard, working collaboratively with clients, consultants, and main contractors to meet demanding programmes while maintaining exceptional quality and attention to detail.

Meet The Team

Sebastian Botiz
Managing Director

Sebastian is the Managing Director of Roman Electrical, with over 20 years of experience in the electrical industry, specialising in the commercial and education sectors.

He has a strong background in both project delivery and pre-construction, successfully leading electrical projects from initial concept through to completion. Working closely with clients, consultants, and design teams, Sebastian focuses on delivering practical, efficient, and cost-effective solutions while maintaining the highest standards of quality and compliance.

Sebastian holds a BA (Hons) in Business Studies, supporting his strategic and commercial approach to project delivery. His combined technical expertise and business insight ensure that every project is managed with a focus on performance, value, and long-term client relationships.

Fraser Woodward
Design & Build Electrical
Project Manager &
Pre-Construction Specialist

With over 20 years of experience in the electrical industry, Fraser brings a well-rounded perspective to every project. Having spent 10 years successfully delivering electrical projects, he developed extensive expertise in project management, programme delivery, and ensuring high-quality outcomes from inception through to completion.

Over the past two years, Fraser has transitioned into pre-construction and sales, where he works closely with clients, consultants, and design teams to develop practical, cost-effective electrical solutions. His background in project delivery provides valuable insight during the planning and tender stages, helping identify opportunities, manage risk, and ensure proposals are both commercially competitive and technically robust.

Fraser is passionate about building strong client relationships and delivering solutions that provide lasting value. By combining hands-on delivery experience with commercial and pre-construction expertise, he helps bridge the gap between project conception and successful execution.

Robert Lloyd
Technical Services Manager

Robert Lloyd is a highly experienced Technical Service Manager with over 25 years in the electrical industry. Specialising in electrical design and technical services, he has built a strong reputation for delivering practical, compliant, and efficient solutions across a diverse range of projects.

Working closely with clients, consultants, and project teams, Robert is committed to delivering high-quality solutions that meet both operational and client requirements. His extensive industry knowledge, combined with a collaborative approach, enables him to navigate complex challenges while ensuring project goals are met effectively and efficiently.

With a focus on quality, professionalism, and client satisfaction, Robert plays a key role in supporting projects ensuring that every project is delivered efficiently, safely, and to the highest professional standards.

Martin Lawler
Head of CAD

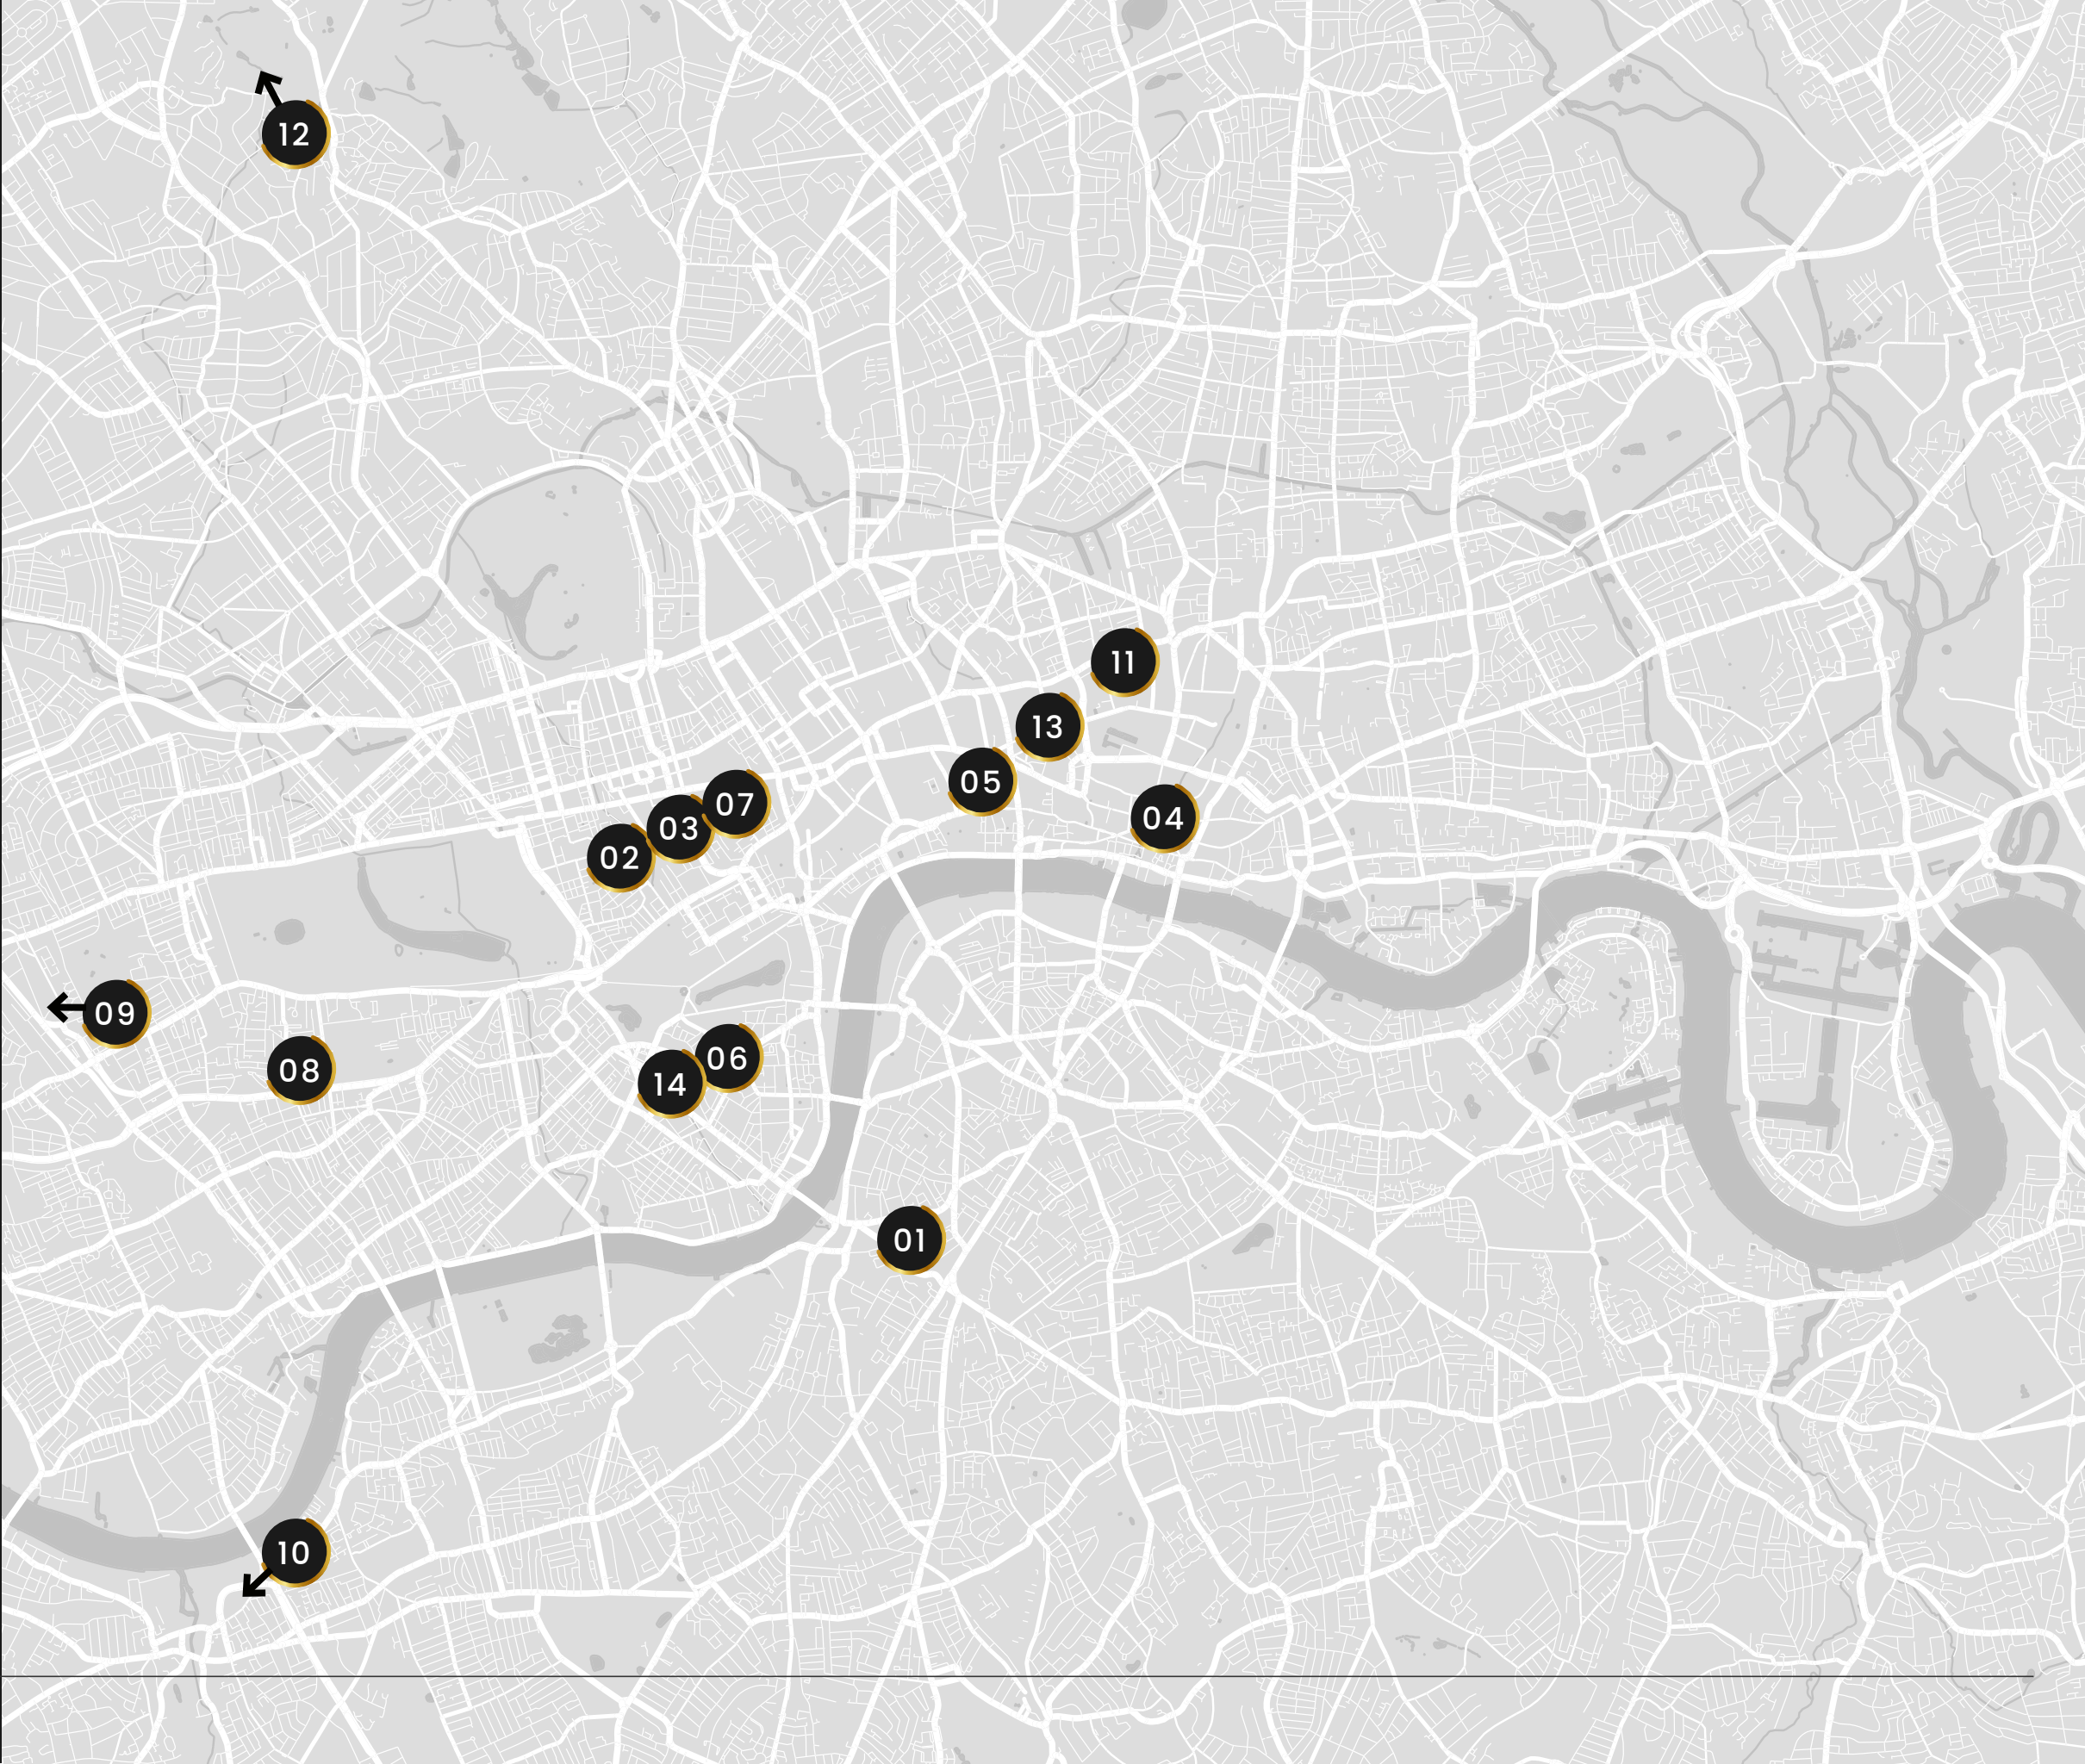

Martin Lawler is the Head of CAD, with over 25 years of experience in the electrical industry, specialising in AutoCAD. He has developed extensive expertise in the production and coordination of detailed technical drawings across a wide range of projects.

Martin works closely with pre-contract and project teams to ensure the accurate and efficient delivery of technical information, maintaining high standards of quality and attention to detail throughout the project lifecycle.

Martin holds a BA (Hons) in Fine Art, bringing creative insight and technical precision to his role. His drafting expertise and collaborative approach help ensure successful project delivery and built environments delivered to the highest standard.
